Keep your text simple – just stick to the key points on your slides. You can say more when you present.

Food and Water

Feeding Schedule

Type of Food

Food and Water

Make sure you have a consistent feeding schedule for your cat. Don’t just leave food out all the time for your cat to eat whenever she’s bored. This can lead to obesity – which is as bad for cats as it is for people.

Select a type of food, one that is healthy for your cat and affordable for you. Sometimes the cheapest food isn’t the best for your cat. Read the label and see what you’re really getting.
If you have more key points you want to put on a slide, use bullet points instead of full sentences. You can also use more than one slide per main point.

**Food and Water**

Feeding Schedule
- Several times a day
- Consistent

Food and Water

Type of Food
- Healthy
- Affordable
